

WE STAND UP FOR YOUR INTERESTS AND WILL ALWAYS TRY TO FIND A SOLUTION.

By participating in various committees from the areas of child day care, we can jointly represent the interests of parents and draw attention to missing needs.

With our own specialist groups, we focus on a topic and can work towards an improvement with sound knowledge.

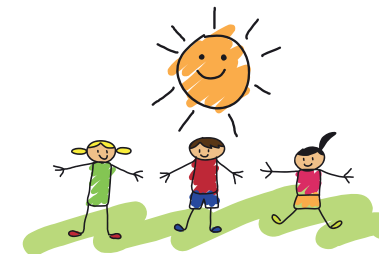

We are the point of contact for the administration, politicians, providers and management staff of day care centers as well as day care workers.

für Kindertagesstätten und Kindertagespflege

FOCUSSED COOPERATIVE VOLUNTARY

OUR CONCERNS ARE

KITA QUALITY

The quality of child day care is influenced, among other things, by the skilled worker key for children, by preparation and follow-up times or inadequate representation models.

NKiTaG

The new NKiTaG (Lower Saxony Law on Child Day Care Centres and Child Day Care) has serious implications for reliable child day care and makes it difficult to organise parents' councils at the national level.

INCLUSION

Children with special educational needs also have the right to participate in early childhood education. However, this participation cannot be guaranteed to every child due to a lack of needs assessment and insufficient provision.

SUPPORT FOR PARENT REPRESENTATIVES

CHILD DAY CARE

After a long break we were happy to welcome parents from the field of child day care as members in summer 2021. In order to be able to represent these interests as well, it is important to strengthen the area of child day care with additional members.

In order to put reliable care in day care on an equal level with care in a day care centers, there is still a need for action in the areas of substitution models and the change from under 3 years old (U3) to over 3 year old (Ü3), among others.

SOCIAL MEDIA

In order to be accessible to you in as many ways as possible, we have our own website and a Facebook and Instagram presence.

To keep you up to date, we share news and useful information here.

QUALITY OF THE LUNCH SERVICE

To ensure healthy, wholesome catering in daycare centers, the DGE (German Nutrition Society) quality standard is an important source of guidance. Unfortunately, equal contributions for catering do not also mean equal values for lunch food. Quality control is lacking here. The often only warm meal for the children per day must be offered with an appropriate quality.
